

The Course Guide

Welcome to The Nutrition Codes Coaching Academy

This is a one-of-a-kind learning platform designed for aspiring fitness coaches, nutritionists, athletes, and anyone passionate about health and performance. Our academy combines cutting-edge science with practical application, ensuring you don't just learn theories but gain the tools to apply them effectively in real life.

About Us

We believe in bridging the gap between evidence-based science and real-world coaching. Our team consists of experienced professionals in fitness, nutrition, coaching, and content creation, all dedicated to helping you succeed in today's competitive industry.

Whether your goal is to build a thriving coaching business, transform your own body and mind, or expand your professional knowledge, we provide the knowledge, mentorship, and community support you need.

Why Are We Different?

Unlike generic courses, we go far beyond surface-level concepts. Every topic is broken down into simple, actionable frameworks that you can immediately apply in real life. Our holistic approach ensures that you're not just learning about nutrition and exercise, but also exploring coaching psychology, social media growth, and research literacy.

With our comprehensive curriculum, you'll explore everything from human metabolism to biomechanics, from client management to content creation, equipping you to thrive as a modern coach. We also integrate real case studies, giving you the chance to see how theory translates into practical solutions.

And most importantly, you'll never be alone through our strong community and personal mentorship, you'll learn alongside peers and be guided by professionals who have already walked the same path.

What Does Our Course Include?

Lifetime Access: Pay once and unlock lifetime access to all past, present, and future lectures.

Evolving Curriculum: There are no fixed timelines. This is a lifelong learning experience, with new topics and lectures continuously added as the industry evolves. **[Click here to view full curriculum](#)**

Personal Mentorship: Get personal guidance to overcome doubts and roadblocks, ensuring you always move forward in your coaching career.

Live & Recorded Sessions: All lectures are delivered LIVE on Zoom during weekends, with full recordings available if you can't attend live.

Additional Resources: Beyond lectures, you'll also receive:

- Textbook recommendations for deeper study
- Lecture PDF notes for easy revision
- A community group to ask questions and network with peers
- Regular LIVE Q&A sessions
- Interactive quizzes to reinforce learning

This is more than just a course, it's a career-long support system designed to help you learn, apply, and grow without limits.

Inside Our Course

Gain first-hand experience of what it takes to run a successful coaching business, stay up to date with the latest topics and trends in the fitness industry, receive science-backed supplement recommendations, and get detailed, well-explained answers to all your fitness-related queries, along with in-depth analysis of complex medical reports, **and so much more.**

The collage consists of several screenshots from a WhatsApp chat group. The background of the chat is dark with a pattern of white icons. The messages are as follows:

- Message 1 (Left):** A long text message with three paragraphs. The first paragraph says: "Do not get frustrated when someone takes more of your time, because there will always be someone else who barely needs any. In the long run, it balances out." The second paragraph says: "In the beginning, give more time to the ones who need it. Over time, as trust builds and they become more confident, they will not require as much hand holding." The third paragraph says: "More than anything, if you can genuinely enjoy talking to the people you work with, you are in a great place. It took me a long time to understand this. Earlier, when I worked with clients through a company, I never fully realized how important this was." The fourth paragraph says: "Most of you are freelancing, which puts you in a powerful position. The sooner you understand this, the better your coaching career will feel and function." The message is timestamped 11:57 AM and has 28 reactions (hearts, thumbs up, etc.).
- Message 2 (Middle):** A message from "Siddhant Prasad" (green name) containing a PDF attachment titled "India's Dairy Cold Chain Problem (1).pdf" (4 pages, 1.5 MB). The text says: "Hello scholars , over the next few days you will see some hype and alarm about microbial contamination in packaged milk. (Trustified video about milk testing) Use this as a learning opportunity and dont over react to the situation. If your clients have questions and concerns you have a chance to be a calm confident voice . Use the attached guide document we have created to help with your communication. Also if you decide to make content about this do give us a shout out :)". The message is timestamped 9:26 PM and has 6 reactions.
- Message 3 (Right):** A message from "Nupur Singh (NC Course)" (green name) containing two links: "Vitamin D3+K2: <https://nutrija.com/vitamin-d3-k2-5000iu>" and "Magnesium Glycinate: <https://amzn.in/d/0hnZ6KXX> (powder form also available of the same brand)". The text says: "(taking this every alternate day, gives you 2500 IUs a day which is a great dose for most people to maintain optimal levels)". A note follows: "Note: The reason I gave D3 and magnesium here as well is because when dosing with calcium, always make sure that both D3 and magnesium needs are also fulfilled to ensure that the calcium gets utilized properly." A postscript says: "Ps. keep high dose (max 500mg at a time) away from high dose zinc/iron/magnesium/fibre at least by 1-2 hours". The message is timestamped 12:52 PM and has 3 reactions.
- Message 4 (Bottom Left):** A message from "Sagar Singh NCA" (green name) saying: "awareness. So from a coaching standpoint, something as simple as telling someone to pick a point (not just any, pick a strategic point that helps to maintain the right form) and keep their eyes fixed there can immediately improve their balance and movement quality." The message is timestamped 8:57 PM and has 4 reactions. Below it is a reply from "You" (blue name) saying: "Walking (especially on a treadmill) relies on three main sensory systems working together: Crazy input bro, thank you so much." The reply is timestamped 8:59 PM.
- Message 5 (Bottom Right):** A message from "Dr. Saikiran Dungi (NC Course)" (green name) saying: "High B12 in blood does not always mean excess vitamin intake. In many cases it reflects underlying inflammation, liver stress, or increased transport proteins released during immune activation. The vitamin gets trapped in circulation instead of entering cells. In this patient the markedly elevated hs-CRP suggests chronic inflammation as the most likely mechanism for the elevated B12 levels." The message is timestamped 6:35 PM. Below it is a follow-up message saying: "Her hs-CRP = 13.6 mg/L which is very high" and "Inflammatory states can increase".

Frequently Asked Questions

Are the sessions live or pre-recorded?

All sessions are conducted live on Zoom, and recordings will be provided for later viewing and revision.

How will communication happen?

Communication will primarily be through WhatsApp. There will be a community group for discussions, networking, and resolving queries, and an announcement group for important updates and reminders.

Will there be additional course materials?

Yes, you will receive revision notes for every lecture, special coaching templates, textbook recommendations to deepen your understanding, and additional resources to stay updated on fitness trends and practices.

Who is this program for?

This program is suitable for everyone, from complete beginners to experienced fitness coaches. Whether you're looking to start your fitness journey, improve your knowledge, or advance your career, this course is designed to help you grow both personally and professionally.

What will I learn?

This program covers everything you need to excel in the fitness industry, including nutrition, exercise, coaching, business, social media, and research. You'll master topics like metabolism, specialized diets, and effective nutrition planning for various needs, such as hypertrophy and injury recovery. You'll gain expertise in anatomy, biomechanics, and training program design, along with injury management. The coaching module focuses on client communication, psychology, and business growth strategies. Social media lessons will teach you how to create impactful content, edit videos, and engage with your audience effectively. Finally, you'll learn how to analyze and apply research to stay at the forefront of the industry.

Frequently Asked Questions

What if I have doubts?

You can ask your questions during live sessions, in the community group, or during dedicated Q&A sessions. If needed, you can also schedule personal meetings with the faculty to resolve your doubts.

How much time will I need to grasp the topics?

The program is self-paced, but dedicating three to six months with consistent effort should be enough to build a strong understanding, especially if you actively participate in lectures and discussions.

When are the sessions held?

Sessions are typically held on weekends at 2 PM. The timing may be adjusted based on student consensus. One lecture per week is planned to give students ample time to absorb and practice the material.

What language will the sessions be in?

The sessions will be conducted in both Hindi and English to ensure every student can easily follow and understand the content.

When can I join, and how long is the course?

You can join anytime, and you'll have lifetime access to all course materials, including past, current, and future content. We plan to keep the course running for as long as the students need to learn, grow, and excel as fitness professionals. The program is continually updated with new topics and lectures to ensure the learning process never stops.

How much time will it take to finish the curriculum?

The curriculum is designed to be completed over the course of one year, allowing you enough time to thoroughly understand, apply, and master each topic while balancing consistency and practical learning.

The end!

Thank you for going through the entire document. We have also added two free lecture links below, along with details about our certification program.

Do go through everything and let us know if you have any questions; we will be happy to answer.
